

BIOTEC SONIC SKIN-RESURFACING FACIAL

A revolutionary resurfacing facial to even skin tone, help treat blemishes and smooth fine lines

THE UNIQUE FUSION OF ACTIVES, TOUCH & TECHNOLOGY

Join the revolution in skincare: effective, results driven treatments that herald a turning point in beauty therapy.

For the first time, Elemis has combined high-potency actives and its unique hands-on therapy with the science of bio-electric technology to deliver a new generation of facials.

THE FACIAL

This high performance facial delivers a high-tech double peel action thanks to the **Resurfacing Activator**, infused with concentrated lactic acid and hyaluronic acid to help boost cell turnover. Elemis' iconic **Tri-Enzyme Peel Off Mask** further helps reveal a brighter complexion, while a soothing scalp massage brings relaxing and rebalancing benefits to both mind and body.

At the heart of every BIOTEC facial is Elemis' unique **Skin Lift TOUCH** therapy. Harnessing the power of hands-on therapy, **Skin Lift TOUCH** softens and prepares the skin, significantly improving functionality and enabling the skin to convert energy from each technology more effectively, whilst rebalancing its micro-flora.

Three treatment technologies – **ultrasonic peeling**, **steam** and **L.E.D. light therapy** – help to reveal skin that is noticeably smoother and even in tone, while minimising the appearance of blemish marks and fine lines.

TREATMENT BENEFITS

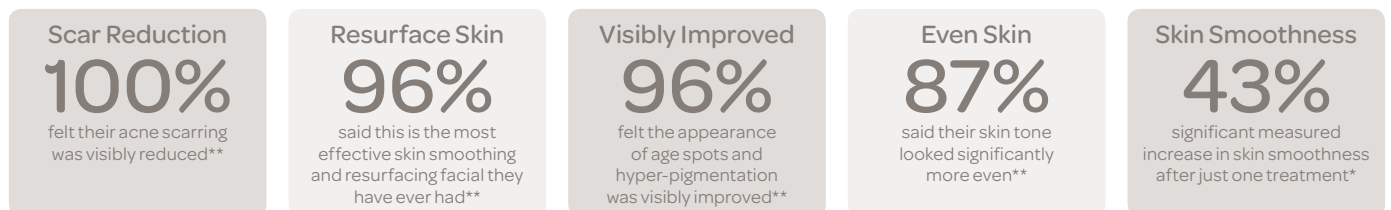

- ✓ Deep cleanses the skin
- ✓ Resurfaces and increases skin smoothness
- ✓ Balances uneven skin tone
- ✓ Visibly smoothes superficial scarring and treats blemishes
- ✓ Reduces the appearance of fine lines and wrinkles

TARGETING

- ✓ Uneven skin tone
- ✓ Blemish marks
- ✓ Fine lines

EXTRAORDINARY RESULTS

In Independent Clinical Trials, the NEW Sonic Skin-Resurfacing Facial delivered exceptional results:

NOELLA GABRIEL, DIRECTOR OF PRODUCT & TREATMENT DEVELOPMENT, SAYS:

"Today's client concerns are increasingly diverse but skin scarring and pigmentation, combined with the effects of ageing is more and more common. The new Sonic Skin-Resurfacing Facial is clinically proven to reduce superficial scarring and blemishes, while working on lines and to offer a highly effective treatment with visible results."
